Global Transportation Company, Bombardier Chooses The WorkPlace Group as Recruitment Partner!

Florham Park, NJ/Leeds, UK - October 14, 2008 - Bombardier is a global transportation company, present in more than 60 countries across five continents. Their 60,000 employees design, manufacture, deliver and maintain the widest range of world-class products in the aerospace and rail transportation industries. Bombardier is headquartered in Montréal, Canada.

The WorkPlace Group® (WPG) is excited to announce they have been chosen by Bombardier as a supplier for permanent staffing personnel across Europe.

“A Specialist company like Bombardier needs the best specialist personnel. Finding them had historically been a real challenge. As a niche supplier of Professional and Technical personnel, WPG is the natural choice to recruit these personnel and allow Bombardier to concentrate on their core business, building world class products”, said Philip Chandler, Director of Business Development, WorkPlace Group Outsourcing Ltd.

WPG is committed to assist Bombardier in their mission to provide superior value and service to their customers, on time, and to manufacture and deliver state-of-the art aircraft and trains to the most demanding of customers.

The WorkPlace Group® family of companies, founded in 1997, provides customized recruitment outsourcing (RPO), project-hiring recruitment, contingent workforce management and professional temporary staffing services for all levels and functions

across industries. Their services are provided globally with staff located throughout the world.

The WorkPlace Group® is thrilled to be working with Bombardier and looks forward to a long and exciting relationship.
